

Leveraging Worldview Diversity

Develop and leverage worldview diversity for performance, innovation and change

1 to 3 day workshops for teams and working groups

Organizations that are able to leverage diversity have a tremendous advantage in terms of their ability to attract talent and to promote innovation. As the “Creative Economy” emerges as the primary driver of economic opportunity and development, innovative approaches to leveraging diversity are increasingly critical to organizational success. Creating a climate that allows people from diverse backgrounds truly to leverage their ideas and perspectives requires ongoing commitment to learning. This dynamic and experiential workshop will introduce participants to the concept of worldview and help them navigate sources of worldview difference more fluidly and with greater results. The workshop is designed to stimulate the desire for more learning about diversity and to help participants develop the knowledge, empathy, and skills required to collaborate in and to lead diverse teams. Workshops can be offered in customized or turn-key formats and range in lengths. We make use of leading edge assessments in the areas of cross-cultural effectiveness and the neuroscience of social behavior including the WholeBrain Creativity Assessment (NBI©).

Key Workshop Benefits...

- Increase understanding of self and of others around issues of cultural diversity
- Create a common vocabulary around worldview differences
- Provide Insight into the human perceptual process and its impact on communication
- Increase skill at communicating effectively across sources of worldview difference
- Build dialogue skills to allow constructive and creative group conversations
